

## ▪ **Required Acknowledgment of USDA Grant Funding in Publications**

As the Division receives funding support through grants from any USDA agency for our research and extension programs/projects, we must acknowledge such support when publishing material written or published with the grant support. Therefore, when publicizing a program/project that was supported at least in part by a USDA agency grant, we must acknowledge the USDA awarding agency support by using one of the following statements on publications written or published with grant support, and, if feasible, on any publication reporting the results of, or describing, a grant-supported activity:

- *“This material is based upon work that is supported by the [insert name of USDA agency that awarded grant], U.S. Department of Agriculture, under award number XXX-XXXX-XXXXX.”*

or

- *“This material is based upon work that is supported, in part, by the [insert name of USDA agency that awarded grant], U.S. Department of Agriculture, under award number XXX-XXXX-XXXXX.”*

One of the above acknowledgment statements must be included on any publication supported by USDA grant funds, depending on whether the USDA grant fully support or partially supported the material. For purposes of this acknowledgment, “publication” means a published book, periodical, pamphlet, brochure, flier, or similar item. It does not include any audiovisuals.

For example, if a publication was written or published with partial support from a National Institute of Food and Agriculture (NIFA) grant, the publication would include the following acknowledgment statement:

*“This material is based upon work that is supported, in part, by the National Institute of Food and Agriculture, U.S. Department of Agriculture, under award number XXX-XXXX-XXXXX.”*

Additionally, except in papers published in scientific journals, if a publication, article, or paper is published about an Extension or Research project/program that has been supported by USDA agency grant funds, you must include the following statement:

- *“Any opinions, findings, conclusions, or recommendations expressed in this publication are those of the author(s) and do not necessarily reflect the view of the U.S. Department of Agriculture.”*

## **NIFA CAPACITY GRANTS**

In addition to the above, the USDA-NIFA has also requested that publications written or published (at least in part) with NIFA capacity grants be acknowledged by use of the following language:

*“This work is/was supported, at least in part, by the USDA National Institute of Food and Agriculture, [insert project type, e.g. Hatch/Evans-Allen/McIntire Stennis] project [insert accession number].”*
